Collect | Ceramic Vase SC66—SC68

The vase is handcrafted which ensures that each vase is unique and has its own character. Differences in features such as colour and shape will give each vase its own personal look.

Daily cleaning of the vase is best done using a dry, soft cloth. If more severe cleaning is necessary, it is recommended to use a soft cloth in combination with a mild cleaning detergent and dry off with a soft dry cloth afterwards. Avoid using abrasive cleaning agents on the vase as this will damage the surface.
